HORANDOM FOR THE RECORD

Cost Experiment - Printing Flant

: Memo to Comptroller Policy Planning Group, dated 14 October 1958

1. The Comptroller's Policy Planning Group met on 7 November 1958 to discuss the classification and recording of certain costs of the Printing Service Division, Office of Logistics. Specifically, the question was how to classify certain costs between those which are to be "recovered" and those which are NOT to be "recovered" from customers of the Printing Service Mivision; also, how to classify and record the latter as costs of the Printing Service Division yet treat them as Agency overhead or as Agency capital expenditures for management purposes.

2. The following persons attended:

Chairman TAS TAS , MIP MIP Budget Division Assistant Comptroller Finance Division

3. The following costs were discussed:

ntilities, and operations and maintenance costs ing in which the printing plant is of the building in which the printing plant is located. Such costs are currently charged to the OL/Real Estate and Construction allotment. It was concluded that there should be no change in the recording of such costs. The reasoning behind this conclusion was that such costs are really agency costs, rather than Printing Service Mivision costs, because, presumably, the building is rented only because space in government-owned buildings is not available.

b. Equipment rental: Certain pieces of equipment in the printing plants are rented. The cost of such rent is currently treated as a Printing Service Division cost. It was concluded that such rental costs should be treated as Frinting Service Mylsion costs which are to be "recovered".

cother than administrative-type equipment). This subject received considerable discussion. Consideration was given to expreciating such equipment on either a straight-line basis or a 100 percent basis. Consideration was also given to the use of a capital expenditure budget in lieu of depreciation, by any method. The cost of new and replacement equipment is now treated as a cost of the Frinting Service Mivision. It was concluded that the cost of new and replacement equipment should continue to be treated as a cost of the Frinting Service Mivision but one which is not to be "recovered"; and that such cost should be recorded in a separate PED cost-center account titled PED/New and Replacement Equipment". This will intiate the cost of new and replacement equipment for management purposes.

including material as well as labor and overhead, at the plant should be charged in total to _____ as the personnel on that shift work on only one job, i.e. remains off mats which have been prepared by _____

STATSPEC STATSPEC

- g. It was concluded that the cost of the Q Building plant should be charged in total to ND/I. This plant performs work for OCI, ORR, and OCR of the ND/I. The basis for distributing the costs between OCI, ORR, and OCR has not yet been determined.
- h. It was concluded to substitute the following costcenter accounts for the PSD cost-center accounts now listed in the thert of Allotment Accounts for Fiscal Year 1959. These Accounts will be set up in wouthered and confidential.
